A Midsummer Night's Dream has led me to imagine new paths only this play could reveal. Focusing on Titania and Oberon, it's been a joyful journey of play and creation with the dancers through Shakespeare's enchanted world. I would like to thank the dancers for their generous contributions to the making of this new work.

In the midst of the chaos that surrounds our current climate, I felt the need to step away and create something with a touch of nostalgic joy - a work that speaks to everyone. I turned to the raw, gritty, and timeless voice of Edith Piaf to celebrate life, love, and resilience, and to bring a touch of Paris to Portland! Her voice, steeped in purity, passion, and strength, carries a power that transcends time.
